

ANALYSIS OF TECHNOLOGY TRENDS

Chris Handley

January 18, 2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Examination of IT survey respondents and IT related job postings
- Analysis of current and desired IT use
- Analysis of respondent demographics
- Data were extracted, cleaned, analyzed and presented graphically
- Dashboards created to portray addition information
- Conclusion: IT continues to be a quickly changing business area which are centered in certain demographics and geographic locations

INTRODUCTION

- Analyze trends in software and web development among developers from countries worldwide
- Purpose of Review and Analysis
 - Identify the top programming languages, top database skills, and the most popular IDEs
 - Identify skill requirements for the future
 - Identify gaps for human resources in IT
- Intended Audience
 - Programmers
 - Human Resources professionals
 - IT industry leaders
 - Programming students

METHODOLOGY

- **Data Sources**
 - 2019 Stack Overflow Developer Survey
 - GitHub Job Postings
 - Programming Languages Annual Salary
- **Data Collection by Use of APIs and Web Scraping**
- **Data Exploration, Cleaning and Wrangling**
- **Data Analysis**
- **Data Visualization**
- **Creation of Dashboards**
- **Presentation of Results**

RESULTS

	Respondent	LanguageWorkedWith	LanguageDesireNextYear	DatabaseWorkedWith	DatabaseDesireNextYear	PlatformWorkedWith
0	4	C	C	MySQL	MySQL	Linux
1	4	C++	C#	SQLite	SQLite	Windows
2	4	C#	JavaScript	NaN	NaN	NaN
3	4	Python	SQL	NaN	NaN	NaN
4	4	SQL	NaN	NaN	NaN	NaN
...
74584	25142	Go	Python	NaN	NaN	NaN
74585	25142	HTML/CSS	R	NaN	NaN	NaN
74586	25142	PHP	NaN	NaN	NaN	NaN
74587	25142	Python	NaN	NaN	NaN	NaN
74588	25142	R	NaN	NaN	NaN	NaN

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 Languages Respondents Use

Next Year

Top 10 Languages Respondents Desire Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript maintains status as top ranking language
- Python fastest growing of all languages listed
- TypeScript growing in popularity

Implications

- Web development languages will continue to be in high demand
- Opportunities to add Python to IT professional's skill sets should be offered

DATABASE TRENDS

Current Year

Top 10 Database Respondents Use

Next Year

Top 10 Databases Respondents Desire Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL is most popular database
- Microsoft SQL Server and SQLite are decreasing in importance
- Increasing interest in PostgreSQL and MongoDB

Implications

- Resources should still be directed towards open-source databases like MySQL
- Resources should be directed away from Microsoft SQL Server and SQLite
- Training should be offered in PostgreSQL and MongoDB as they grow in importance

DASHBOARD

Dashboard URL

`<https://us1.ca.analytics.ibm.com/bi/?perspective=dashboa
rd&pathRef=.my_folders%2FCapstone%2B-
%2BTechnology&action=view&mode=dashboard&subView=
model0000018d0f2a866b_000000000>`

CURRENT TECHNOLOGY USAGE (DASHBOARD TAB 1)

Top 10 Languages Respondents Use

Top 10 Database Respondents Use

Platforms Utilized by Respondents

Web Frames Respondents Use

FUTURE TECHNOLOGY TRENDS (DASHBOARD TAB 2)

Top 10 Languages Respondents Desire Next Year

Top 10 Databases Respondents Desire Next Year

Platforms Respondents Desire Next Year

Web Frames Respondents Desire Next Year

RESPONDENT DEMOGRAPHICS (DASHBOARD TAB 3)

Respondents Classified by Gender

Gender
● Woman ● Man

Respondents Classified by Country

Respondent (Count)
1 3,058

Number of Respondents by Age

Respondent's Gender Classified by Education Level

DISCUSSION

- Shifts from current to future needs in programming languages, database skills, and IDEs
- Demographic, education and geographical gaps within IT
- Change management as platforms and software move in and out of favor

OVERALL FINDINGS & IMPLICATIONS

Findings

- Technology trends shift quickly, on a yearly basis
- Shift towards more open source platforms such as MySQL and Python
- Respondents were predominantly younger, male and from the USA & India

Implications

- Companies and programmers should be prepared to learn new IT solutions (platforms, languages and database) quickly
- Education opportunities should prioritize women and those outside of the USA & India to draw increased equity in workforce

CONCLUSION

- IT professionals represent distinct demographics (younger and male)
- IT environment is changing rapidly in notable directions such as open source and cloud based solutions
- Agility and speed in adapting to changing trends will create success in the future of IT
- IT leaders, IT professional organizations and human resource professional should prioritize solution to bring demographic and geographic equity to the IT workforce
